The available databases on HeinOnline – for example, Law Journal Library - are listed on the home page.

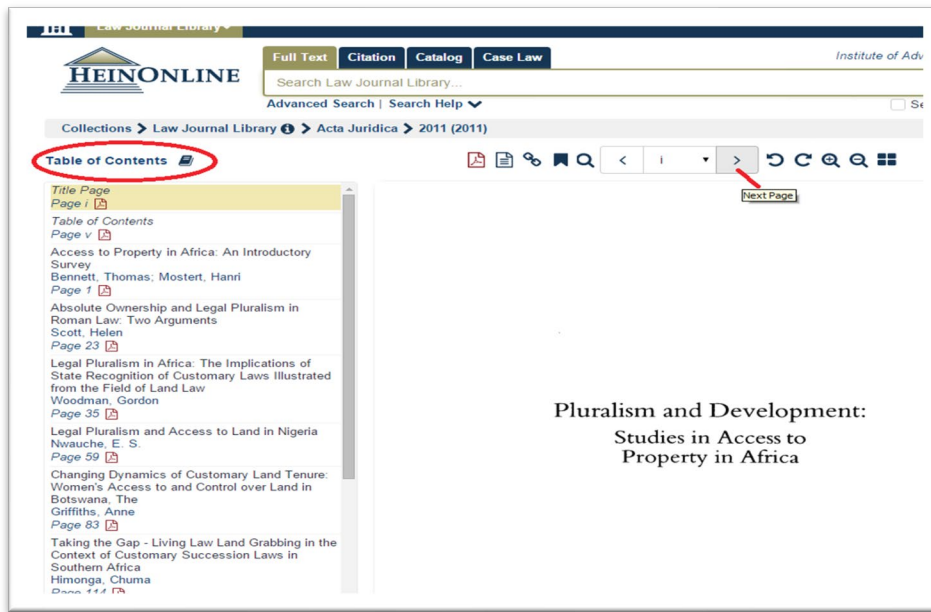

Select a database, then browse by title or other criteria:-

The screenshot displays the HeinOnline interface for the Law Journal Library. At the top, there are navigation tabs for 'Full Text', 'Citation', 'Catalog', and 'Case Law'. Below these is a search bar with the text 'Search Law Journal Library...' and a 'Search' button. A red circle highlights the 'Browse by:' options: 'All Titles', 'State (U.S.)', 'Country', 'Subject', and 'Most-Cited'. Below this, there is a list of databases with their respective details:

Browsing HeinOnline's Law Journal Library

To read a journal, click on its title in the Law Journal Library, choose a volume, then select an article from the Table of Contents (circled below).

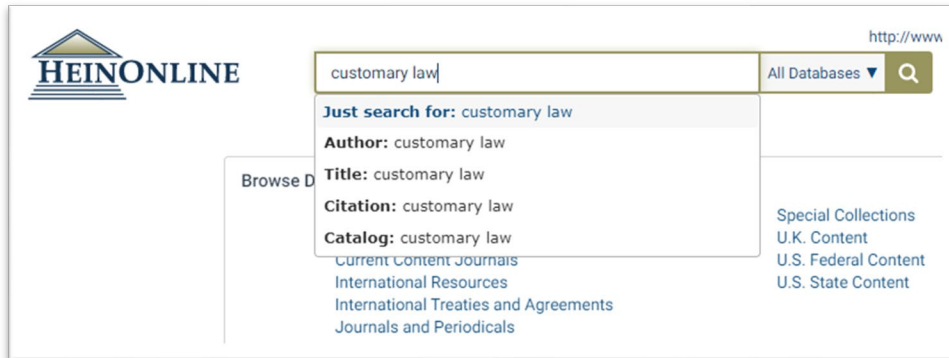

To move through a volume or article, click on the arrows at the top of the page, or use the page number drop-down menu.

Searching

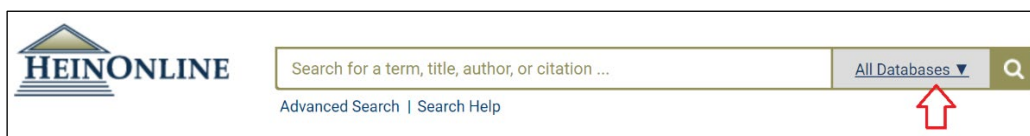

Start typing search terms and select the type of search: key word search ('Just search for'), author/ title/citation search, or Catalog search.

The Catalog is the contents list of the entire HeinOnline service. Enter the name of a book, journal or other publication in a Catalog search to see if it is on HeinOnline.

To restrict your search to a specific HeinOnline database – for example, the Word Treaty Library - select the database from the home page before searching.

To search two or more databases, click on the 'All Databases' drop-down menu next to the search box, then make your selection:

An Advanced Search facility is available below the main search box.

Tips for searching

Connectors must be in capital letters, for example:

arbitration AND evidence

employment OR labor OR labour

Phrases should be in double quotation marks, for example, **“regional custom”**.

To find variations of a word, truncate it using an asterisk: **bank*** finds *bank, banks, banker, bankers, banking, bankrupt*, et cetera.

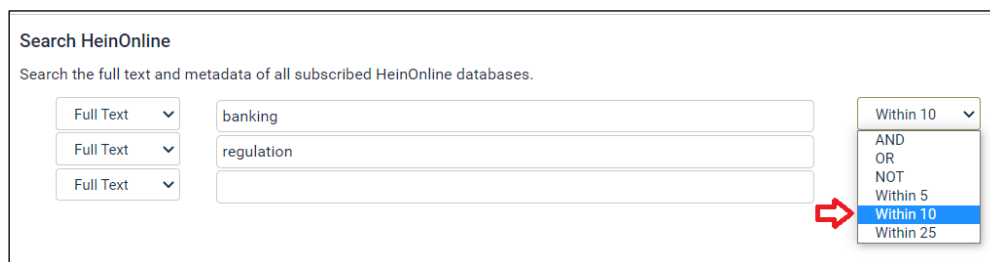

To find documents in which your search terms appear close together, connect them with **/s**, **/p** or **/#**, for example:

regulation /s banking (finds search terms in the same sentence)

regulation /p banking (finds search terms in the same paragraph)

regulation /20 banking (finds search terms within 20 words of each other; any number can be used)

Alternatively, select Advanced Search and change the ‘AND’ connector to a proximity connector, e.g. ‘Within 10’, ‘Within 25’. You will also need to change the second field label to ‘Full Text’.

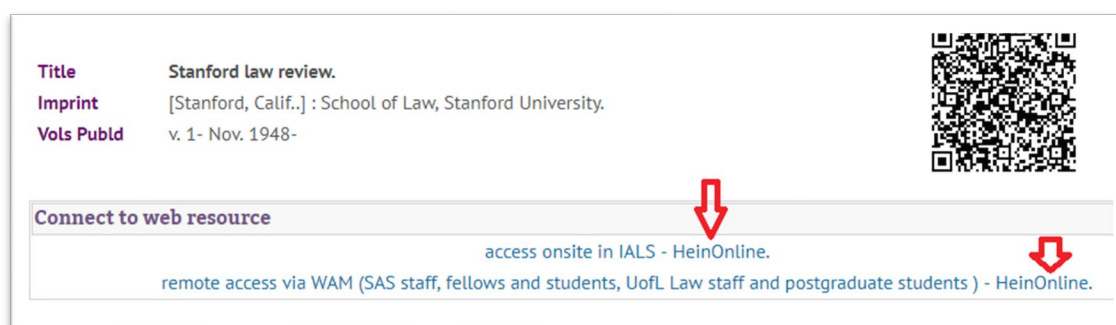

The screenshot shows the 'Search HeinOnline' interface. It includes a search box with the text 'banking' and 'regulation'. To the right, a dropdown menu is open, showing options for proximity connectors: 'Within 10', 'AND', 'OR', 'NOT', 'Within 5', 'Within 10' (highlighted), and 'Within 25'. A red arrow points to the 'Within 10' option. Below the search box, there are three 'Full Text' dropdown menus.

Further information about searching is available if you click on ‘Search Help’, underneath the Search box on the home page.
